The patent to Ogawa (U.S.P. 5,092,257) is cited to disclose a thread prohibiting unit for prohibiting a threading rod from being operated if a presser foot detector detects that a presser foot has been lowered or if a sewing machine motor is being operated. Ogawa (U.S.P. 5,086,718) discloses another thread prohibiting unit for prohibiting a threading rod from being operated if a thread take-up operation is occurring.

The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires a thread limiting unit limiting a threading mechanism so that the threading mechanism is inoperative in a case where a thread cassette is attached to a cassette mount when a sewing apparatus is disconnected from a power supply.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
